

Vision Commercial Kitchens have recently completed work at Knole Academy. Vision were tasked with providing a training kitchen for students who are undertaking catering training in their final years.

Vision worked with the Main Contractor, Willmott Dixon and the client, Knole Academy School to achieve the specification of kitchen that they needed within the required budget. Vision faced a challenge with the extract within the scheme due to the duct run length and complexity; however Vision overcame this challenge and ensured that the project was completed on time.

Vision installed the kitchen - including a very large fresh air preheater - handed over to the client and provided training for the end user. Both Willmott Dixon and the client were extremely pleased with the end results.
