

## **Vision Commercial Kitchens have recently completed work at Morley Nurseries.**

Morley Nurseries is a family run business in Woking. The onsite tea room is open daily serving morning coffee, light lunches and afternoon tea.

Vision first met the team at Morley Nurseries at Glee. They told Vision how they were refurbishing various areas within their garden centre and that the coffee shop was a focal part of the refurbishment plans. The aim was to completely change the look of the restaurant and give it a new feel, therefore the counter was an integral part of the structure and overall ambience of the restaurant.

The team at Morley Nurseries looked at a variety of sites that Vision had worked on to get an understanding of what they wanted to achieve and Vision's in-house design team created a design which they ultimately went with.

The install programme was tight as the garden centre didn't want to lose trading time and so Vision carried out all works within a small timescale in order to minimise this loss. The whole team at Morley's are extremely pleased with the finished design which has revolutionised the service, look and overall feel of the restaurant.

We have a family run business which was established over 40 years ago. We decided it was time to open a coffee shop within the garden centre, it has since proven very successful. It started on a small basis growing over the past 6-7 years - it's been a good move.

We decided that we wanted to expand our tea rooms as we were getting busier, we paid a visit to the Glee show at the NEC, saw Vision on one of the stands, invited them over to come and see our garden centre and how we could improve on what we'd already got here at the time.

Vision came to see us, we had one or two meetings, they drew some plans up for us, a few different ideas were bounced around and the end product came out very well. We're really pleased with what they've done and the customers are very happy also with the outcome of the new service. We're all really pleased!
