

**Wycombe Abbey is an all girls boarding school in High Wycombe, Buckinghamshire. The client came to Vision wishing to create an additional establishment to complement the main school dining hall. To be named The Courtyard, it would be a space where students can eat, work, socialise and entertain parents and visitors.**

Vision designed, installed and project managed the new catering facility which included the kitchen, the servery counter and island unit. As the front of house was quite a complex job, Proline supplied completely bespoke fabrication for the counters. These were of a high specification and tailored specifically to suit the school and the requests of the client.

The kitchen equipment included a Hobart hood type dishwasher and several True refrigeration cabinets. Vision worked closely with Ian Downie, the Estates Director, the architect and the contract caterer throughout the process to ensure everything ran smoothly and the new facility would achieve its objectives.

Although there were some elements of difficulty, Vision managed to complete the project on time and on budget, leaving the client extremely pleased.

I couldn't be happier with the work Vision have done. The Courtyard is a modern, stylish space and a fantastic addition to the school's catering facilities.

Feedback from the girls has been very positive and we want to thank Vision and all the parties involved. We will look to Vision for any future expansions.

- Ian Downie, Estates Director, Wycombe Abbey
