

Ashridge Business School was established in 1959 and soon became one of the world's leading centres for executive education. It is consistently ranked as one of the world's top business schools in the annual Financial Times rankings.

Vision recently completed a full kitchen fit-out within the business school. The timeline for the project was very tight yet Vision still managed to successfully complete the project ahead of schedule. The equipment which Vision installed within the kitchen was of unrivalled quality and durability which suits the busy and demanding environment within the business schools catering facilities.

Whilst stripping out the old kitchen equipment, Vision uncovered a grand fireplace which has been incorporated into the design of the kitchen as a feature piece.

The works completed within Ashridge Business School included:

- Full kitchen fit-out (including Cook Island and Flexi Chef)
- Combination ovens and Bratt Pan
- Coldroom and waste de-waterer
- All mechanical and electrical works: including floors, walls and ceilings, electrical works and new extraction canopy

The completion of the project was set within a very tight timeframe. However, against this challenging schedule Vision, supported by their contracting teams, were able to deliver, ahead of schedule, a world class kitchen fit-out consisting of exceptional high performance equipment fit for our very demanding environment.

Vision have provided an invaluable service in their contribution to our new kitchen fit-out and the whole team are thrilled with the outcome.

- Ian Downie, Facilities Manager

Once again Vision have delivered a first rate job and kitchen. Dealing with Vision has been a pleasure, many thanks on a great job.

- Paul Patterson, Head Chef
