

**Deva Point in Chester is the latest flagship development by Wulvern Housing that allows residents to continue living independently.**

This site provides 63 one and two bedroom self-contained apartments for over 55s. The development includes a modern and stylish bistro which was designed, supplied and installed by Vision Commercial Kitchens.

Vision were asked to assist with the design for the new care home. The brief was to provide a robust, useable and flexible kitchen for the bistro cafe. The aim was for the bistro to be used by both the residents as well as passing trade as a way to increase revenue.

The project was completed within a tight timeframe which was made more complicated due to the ductwork run required. Vision supplied and installed all of the kitchen equipment as well as the hygienic wall cladding and the specialist digi-clad which is located behind the servery counter. Not only was the project delivered and installed within the specified timescale but it was also completed under budget.
